Founder | Future Graduate (2026)

EDUCATION

ECOLE CENTRALESUPÉLEC

2022-2026

Currently in final year of engineering at CentraleSupélec

Gif-Sur-Yvette, France

- Major: Artificial Intelligence
- Relevant Courses: AI Project, Optimization, Project Management, WEB Data Intelligence, Cloud Computing, High Performance Computing, Software Engineering
- Associations: ADR Vice-President (Organization and setup of QuadraBang with over 4000 participants), IT Manager for Cercle Europe (Website maintenance)

LYCÉE MICHEL DE MONTAIGNE

2020-2022

*Preparatory Classes: MPSI-PSI**

Bordeaux, France

- Intensive Mathematics, Physics, and Engineering Sciences

LYCÉE GUSTAVE EIFFEL

2017-2020

European Section in Mathematics - English

Bordeaux, France

- Baccalauréat with highest honors (Mention Très Bien) in European English section

PROFESSIONAL EXPERIENCE

AI-ENGINEER - RENEWEX

March 2025 - August 2025

- Deployed a document parsing AI product with RAG (Mistral, OpenAI, Google OCR, Tesseract) to production
- Improved parsing robustness and precision by increasing validation mechanisms
- Implemented building GPS coordinate extraction on a map (OpenCV, binary classifier)
- Added an asynchronous Python client to speed up parsing

SOFTWARE-ENGINEER/DATA-ANALYST INTERN - RENEWEX

September 2024 - February 2025

- Optimized development workflow with NeoVIM
- Developed and deployed Python code to production (Gitlab, Pytest)
- Set up and optimized data pipelines with Dagster
- Modeled and optimized databases with SQLAlchemy and PostgreSQL

PROJECTS

SCHOOL AI PROJECT - CEA-LETI / ECOLE CENTRALESUPÉLEC

September 2023 - June 2024

- Mastered PyTorch and trained in Computer Vision
- Trained models using supervised learning (Mask-RCNN) and unsupervised learning (AE, GAN, Clustering)
- Managed meetings with professional clients

1ST PLACE ORANO HACKATHON - REX SHEET MANAGEMENT INTERFACE

May 2024

- Developed and designed a Progressive Web App in one day
- Integrated a SQL database search engine using vectorization and Transformers

PERSONAL PROJECT - POKER ASSISTANCE INTERFACE

January 2024 - February 2024

- Trained Resnet-18 models to recognize Poker cards
- Developed a Python interface displaying probability distributions to guide the player
- Encoded game state as input for neural networks

SKILLS

- **Programming:** VIM, Python (PyTorch, Numpy, Pandas, Matplotlib, SQLAlchemy), GitLab, Java, Lua, MATLAB, SQL, HTML, CSS, JS, C#
- **Languages:** French (Native), English (C1+ LinguaSkill from Cambridge), German (B1) and Spanish (A2)
- **Music:** Piano and music theory lessons for 7 years
- **Sports:** Skateboarding (2017-2022), Archery (2018-2021)
